Abstracts

SPECT (Single Photon Emission Computed Tomography) radiopharmaceuticals are compounds that contain a radioactive isotope used in conjunction with SPECT imaging techniques. These radiopharmaceuticals emit gamma radiation, which is detected by a gamma camera during a SPECT scan, creating detailed 3D images of the internal structures and functions of the body. These radiopharmaceuticals are primarily used for diagnostic imaging, allowing healthcare providers to evaluate the function of organs, tissues, and systems without invasive procedures. SPECT radiopharmaceuticals are a type of radioactive tracers used in nuclear medicine imaging that can help doctors detect heart disease, neurological diseases, cancer, bone diseases, and thyroid diseases. They rely on short-half-life radioisotopes to obtain physiological function information through SPECT scanners, and have important applications in modern medicine. From a regional perspective, North America and Europe have advanced medical infrastructure and strong R&D capabilities. As the world's largest radiopharmaceutical market, they have promoted the widespread use of SPECT radiopharmaceuticals. The increase in medical demand in emerging markets such as Asia Pacific and Latin America will provide new growth momentum for the SPECT radiopharmaceutical market. Global leading suppliers include GE Healthcare, Cardinal Health, Lantheus Medical Imaging, Bracco Imaging, Curium Pharma, etc. The production of radiopharmaceuticals requires complex nuclear technology and strict safety supervision. These high technical barriers limit the entry of new companies and maintain the stability of the market. With the advancement of medical technology, new radioisotopes and labeling methods will be developed to improve the accuracy and efficiency of SPECT imaging and promote market development.

The global SPECT Radiopharmaceuticals market size was estimated at USD 5169.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

16.70% during the forecast period.
