Report Overview

Conveyors are based on a new and innovative technology, offering many features and benefits. A spiral conveyor needs less floor space than conventional conveyors and are also faster and more reliable than any elevator or lift. Conveyor systems often need to go above, under or around other equipment, walls, walkways, workspaces, and various other obstacles. Although conveyors are traditionally employed for horizontal movement, when a product needs to travel down, spiral conveyors are a top option. They take up a fraction of the floor space compared to a traditional conveyor, resulting in potentially significant financial savings. Spiral conveyors can be used for merging products from a multi-level pick module on to a single takeaway conveyor line. They can also be help accumulate product on the spiral to increase buffer time.
