Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Spiral Pre-Cooler competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global spiral pre-cooler sales reached approximately 4500 k units, with an average global market price of around US\$ 1700 per unit. The spiral pre-cooler is a critical equipment in poultry slaughter lines, specifically designed for cooling, cleaning, and disinfecting poultry carcasses after evisceration. Comprising a stainless steel tank, frequency conversion drive system, spiral conveyor system, air blast system, and discharge system, it utilizes cooling media (typically flake ice) to maintain phased water temperature control (front section below 16°C, rear section below 4°C). Poultry carcasses move slowly through the cold water via spiral propulsion while the air blast system ensures continuous tumbling for uniform cooling, blood residue removal, and surface disinfection. Its technical advantages include energy-efficient frequency conversion speed adjustment, hygienic stainless steel construction, and optimized discharge uniformity, directly impacting microbial indicators, shelf life, and processing efficiency of poultry products. The upstream supply chain includes food-grade stainless steel plates, frequency conversion motors, spiral conveyor components, ice makers, and disinfection equipment suppliers. The midstream involves sheet metal welding, drive system integration, hydrodynamic testing, and sanitary certification. Downstream integration targets poultry slaughter lines, serving large meat processing plants, food conglomerates, and export-oriented poultry enterprises, requiring compliance with HACCP certification and daily CIP cleaning protocols.

The global Spiral Pre-Cooler market size was estimated at USD 765.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.10% during the

forecast period.
