Abstracts

The molecular weight cutoff range of the spiral ultrafiltration membrane is 1000-200,000 Daltons. The ultrafiltration membrane can intercept large molecular impurities (such as proteins, pigments, polysaccharides, etc.) and pass through the target product; it can intercept the target product and pass through small molecular impurities (inorganic salts, small molecular pigments, monosaccharides, ash, etc.) and water. It can also separate target products of different molecular weights, thereby replacing traditional activated carbon decolorization, resin impurity removal, crystallization extraction and other purification processes to achieve the purpose of decolorization, impurity removal and product classification. This report does not include spiral reverse osmosis RO membranes and spiral nanofiltration membranes. Global key players of Spiral Ultrafiltration Membrane include Alfa Laval, Veolia, MANN+HUMMEL, Nitto Group, Synder Filtration and RisingSun Membrane, etc. Top five players occupy for a share about 52%. Europe is the largest market, with a share about 39%, followed by North America and China. In terms of product, Polyethersulfone PES is the largest segment, with a share over 75%. In terms of application, Food and Beverage is the largest market, with a share over 48%. In recent years, there are several companies in the market whose dynamics are worth noting, such as: DuPont Water Solutions acquired Inge GmbH in 2020, and then consolidated ultrafiltration technologies under the new IntegraTec? brand (Inge?, Memcor?, and DuPont Ultrafiltration), and plans to spin off the water tech business in 2026. In 2021, Microdyn-Nadir was renamed MANN+HUMMEL Water & Fluid Solutions. In 2022, SUEZ Water Technologies was acquired by Veolia and is still included in the Veolia Water Technologies & Solutions (VWTS) business. In 2023, Koch Separation Solutions was acquired by Sun Capital Partners and renamed Kovalus Separation Solutions. 3M spun off its health care business in 2023 and became an independent company Solventum.

The global Spiral Ultrafiltration Membrane market size was estimated at USD 179.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.60% during the forecast period.
