Report Overview

Spray-free PP material is a plastic material that can be directly injection molded without spraying to form different colors and effects. It adds special pigments such as metal powder, pearlescent powder, and ceramic powder to PP (polypropylene) raw materials to make it highly glossy, resistant to chemical solvents, and environmentally friendly. Compared with ordinary PP materials, spray-free PP materials have the following advantages: Cost savings: The spraying process is eliminated, production time and human resources are reduced, and the overall cost is reduced by 20-30%. Environmental protection and health: It avoids the pollution of the environment and human body caused by spraying, and the materials can be 100% recycled. Diverse and beautiful: It can achieve a variety of appearance effects such as black and bright, metallic luster, flashing, natural texture, matt, etc. to meet market demand.
