Report Overview

Spraying & plastering machines facilitate a plasterer to skim a drywall five times faster than using the conventional method of hand float. The spraying & plastering machine is gaining its demand due to rapid growth in the infrastructure development that has led to an increase in residential construction and high demand for high-rise buildings.

The demand for high rise buildings is on the rise due to accommodation requirements of nuclear families and amenities provided such as gyms, swimming pools, club houses, and others to attract buyers. The increased demand for high-rise buildings provides ample potential for spraying and plastering machines. In addition, construction of high rise buildings incurs high demand for the market as workers' safety is a significant factor due to higher elevation levels.
