## Abstracts

Spun-dyed yarn is a yarn that is dyed before the fiber is spun, also known as "solution dyeing". Unlike the traditional post-dyeing process, pre-dyed yarn adds dyes directly to the spinning solution during the fiber manufacturing process, so that the fiber has color when it is formed. This process has the characteristics of high efficiency, environmental protection, and high color fastness, and is widely used in textiles, home furnishings, industry, and automobiles.

The global Spun-Dyed Yarns market size was estimated at USD 1512.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.80% during the forecast period.
