Report Overview:

Stage curtains are large pieces of cloth that are designed to mask backstage areas of a theater from spectators. They are designed for a variety of specific purposes and come in several types; many are made from black or other dark colored, light-absorbing material, and heavyweight velour is the current industry standard for these. Theater drapes represent a portion of any production's soft goods, a category which includes any cloth-based element of the stage or scenery (though not including cloth theater costumes or wardrobe). Theater curtains are often pocketed at the bottom to hold chain to weight them down so that they move less or to accept pipes to remove their fullness and stretch them tight.
