### Report Overview

Stain remover products are available in various forms such as liquids, powders, bars, sprays, sticks, tablets, wipes, foams, gels, and packs. These products usually contain bleaches, surfactants, enzyme preservatives, fragrances, and coloring agents depending upon the type. The common stain types are mud, milk, soil, barbecue sauces, red wines, beetroot, coffee, coke, blood, honey, mayonnaise, baby food, honey, oil, and tomato sauce. Stains and spots on clothes can be removed if they are treated with the right products at the right time. Freshly occurred stains are usually easier to treat; thus, manufacturers are focusing on pre-laundry cloth treatment products which are portable, compact, and convenient to use. The stain remover keeps clothes fresh and soft for a longer period of time, thereby extending the clothes life.

The major trends in this market include eco-friendly stain remover products and increasing demand from developing countries. The vendors of laundry care products are coming up with the green laundry concept with the usage of more biodegradable components in the product offerings. Some of the leading eco-friendly stain remover products are Attitude Eco-Friendly Laundry Stain Remover, Citra Spot Natural Stain and Odor Remover, Everyday Stain & Odor Eliminator, and 365 Pre-Wash Stain Remover.
