Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Stainless Steel Seamless U-tube competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of seamless stainless steel U-tubes reached 420,000 tons, with an average selling price of US\$4,850 per ton. Seamless stainless steel U-tubes are high-pressure heat exchange tubes produced by cold drawing or cold rolling. Their U-shaped bending process is used in fluid medium heat exchange systems in boilers, heat exchangers, nuclear power steam generators, and petrochemical plants, offering characteristics such as corrosion resistance, high-temperature strength, stress crack resistance, and compact structure. Upstream raw materials mainly include stainless steel round tube billets, nickel, chromium, molybdenum, and titanium alloys. Representative companies include Baosteel Special Steel, Shandong Iron & Steel Yongfeng, Outokumpu, POSCO, and Jindal Stainless. Downstream applications are mainly in the power, petrochemical, nuclear, seawater desalination, and high-end equipment manufacturing sectors, with major customers including Sinopec, CGN, Shell, and Siemens Energy. Global total production capacity is approximately 550,000 tons, with an average gross profit margin between 18% and 25%. Upstream stainless steel tube billets and nickel alloys account for approximately 70% of the cost, while downstream chemical and energy heat exchange equipment manufacturing accounts for approximately 60% of consumption. The future market will develop towards high-purity ultra-long U-shaped tubes, high-nickel corrosion-resistant alloy tubes, and intelligent testing and manufacturing to meet the upgrading needs of nuclear power and green energy equipment.

The global Stainless Steel Seamless U-tube market size was estimated at USD 2038.0

million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.20% during the forecast period.
