## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Stainless Steel Wafer Butterfly Valve competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of stainless steel wafer butterfly valves reached 26.8 million units, with an average selling price of US\$42. Stainless steel wafer butterfly valves feature a thin, wafer-like structure, a disc as the opening and closing element, and rotate along the valve body's axis to achieve fluid flow control and regulation. They are compact, lightweight, easy to install, and have excellent corrosion resistance. They are widely used in fluid control systems in the petrochemical, metallurgical, power, food, pharmaceutical, and water treatment industries. The main upstream raw materials are 304/316L stainless steel castings, stainless steel rods for valve stems, rubber or PTFE seals, and transmission components. Suppliers include Outokumpu, Tsingshan Holdings, Aperam, WackerChemie, and DuPont. Major global manufacturers have a total annual production capacity of approximately 250 million units, with an average industry gross profit margin of approximately 25-32%. Industrial fluid control accounts for approximately 45% of downstream demand, municipal and water treatment accounts for approximately 30%, and the food and pharmaceutical industries account for approximately 25%. Stainless steel accounts for approximately 70% of the machine's weight, while sealing materials and transmission components account for approximately 30%. Future developments lie in the integration of intelligent actuators, series-developed high-temperature, high-pressure, and corrosion-resistant designs, and supporting digital pipeline monitoring systems.

The global Stainless Steel Wafer Butterfly Valve market size was estimated at USD 1126.0 million in 2025 and is projected to grow at a compound annual growth rate

(CAGR) of 5.50% during the forecast period.
