Abstracts

Steel welded wire mesh is a prefabricated reinforcement material manufactured by welding together longitudinal and transverse steel wires at precise intersections to form a grid pattern, available in various wire gauges, mesh sizes, and surface treatments such as galvanized or PVC-coated to enhance corrosion resistance. It is widely used in construction for concrete reinforcement, fencing, machine guards, partitions, animal enclosures, and agricultural applications due to its strength, uniformity, ease of installation, and cost-effectiveness compared to hand-tied rebar. The product meets international standards like ASTM, ISO, and BS, and its versatility allows customization for specific load-bearing requirements, thermal expansion properties, and environmental conditions.
