Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Step Grinding Machine competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. The Step Grinding Machine is a machine used for grinding and forming workpieces to form step-down outer diameters. At present, the common step-down grinders on the market have only one layer of guide rails to drive the work head frame to move, and the moving stroke is relatively small.
