Abstracts

Sterile powder-free nitrile exam glove is a medical-grade glove made of synthetic rubber material nitrile, which does not contain natural latex and is suitable for people who are allergic to latex. Compared with latex gloves, nitrile gloves have stronger puncture resistance and chemical protection, and are widely used in medical examinations, laboratory operations, food processing and industrial fields. The 'powder-free' design avoids allergies or contamination problems that may be caused by talcum powder, improves wearing comfort and operating safety, and is particularly suitable for work scenarios that require high hygiene standards and a pollution-free environment.
