Report Overview

Still drinks are beverages and drinks without carbonation. They lack fizziness or alcohol. They also include ready to drink beverages that contain artificial non-carbonated flavors and colorings. It comprises juice drinks that have lower fruit content and sports drinks which are hypotonic or isotonic in nature. Still drinks also include bottled water available in different flavors and functional beverages that are enriched with vital vitamins and minerals.

The most evident opportunity in the global still drinks market lies in cultivating consumers in the new urban areas in Asian, Latin American, and East European countries. The underdeveloped still drinks market in these countries means that an appreciable number of unharnessed opportunities still exist in key markets within these regions.
