Report Overview

Stone ground buckwheat flour is a type of flour that is made from whole buckwheat groats that have been ground using traditional stone grinding methods. Buckwheat is a pseudo-grain that is naturally gluten-free and often used as a substitute for wheat flour in baking and cooking. The stone grinding process involves milling the buckwheat groats between two large, heavy stones to create a fine, powdery flour. This method is considered more traditional and retains more of the nutritional benefits of the whole grain compared to modern steel roller milling techniques. Stone ground buckwheat flour has a distinctive flavor and texture. It is darker in color compared to refined wheat flour and has a slightly nutty, earthy taste. It is also coarser in texture, which can add a pleasant texture to baked goods.
