### Report Overview

SPC stands for Stone Polymer Composite, a limestone core combined with PVC dust and a stabilizer. As a result, it's denser due to the core being 60-70% limestone with a 30% PVC core fused together. Often referred to as rigid core, SPC is 10X more impact resistant than WPC. It's also more stable to sunlight, can be installed in sunrooms, and has better scratch resistance compared to WPC.
