Storage Tank Survey Solution refers to a comprehensive suite of services and technologies used to assess the structural integrity, geometry, and compliance of storage tanks in industries such as oil and gas, petrochemicals, water treatment, and power generation. These solutions involve advanced inspection techniques including laser scanning, drone and robotic inspections, ultrasonic thickness testing, floor settlement surveys, and 3D modeling to evaluate key parameters like tank verticality, roundness, wall deformation, roof deflection, and foundation settlement. The primary goal is to ensure that tanks meet regulatory standards (such as API 653, EEMUA 159, or EN 14015), maintain operational safety, and optimize maintenance planning. Modern storage tank survey solutions also integrate digital technologies such as point cloud data, CAD/BIM modeling, and predictive analytics to deliver accurate, actionable insights for asset management and life extension strategies.
