Strategic sourcing application suites are a set of related, integrated solutions that support upstream procurement activities; in other words, the strategic work the procurement team does for planning, assessment and performance management. Strategic sourcing application suites are used primarily by companies with \$800 million or more in annual revenue that, typically, have the necessary critical mass of spend. The strategic sourcing application suite delivers four primary capabilities. Most vendors offer these capabilities as separately licensable modules: Spend analysis is a software- and service-based solution for cleansing, enhancing, classifying and analyzing spend data.
