Abstracts

Strawberry juice is a beverage made from the extraction or pressing of strawberries. It is a popular fruit juice known for its sweet and refreshing taste. Strawberry juice can be made using fresh strawberries or commercially available strawberry juice concentrates. To make homemade strawberry juice, fresh strawberries are typically washed, hulled (removing the green stem), and blended or pureed. The resulting mixture can then be strained to remove any pulp or seeds, although some people may prefer to keep the pulp for added texture. Sugar or sweeteners may be added to enhance the sweetness, depending on personal preference. Commercially produced strawberry juice is often found in supermarkets and grocery stores, available in both regular and concentrated forms. These products may also contain added ingredients such as preservatives, flavors, or other fruit juices for flavor enhancement or as a blend. Strawberry juice is a versatile beverage that can be enjoyed on its own as a refreshing drink, or it can be used as an ingredient in smoothies, cocktails, and other culinary creations. It is known for its rich vitamin C content and is often appreciated for its vibrant red color and natural strawberry flavor. The global strawberry juice market refers to the worldwide demand, production, and sales of strawberry juice products. The market has seen significant growth in recent years due to the increasing popularity of fruit juices, health consciousness, and the versatility of strawberries as a flavor. Some key factors contributing to the growth of the global strawberry juice market include:

- Health and Wellness Trends:** Consumers are increasingly seeking healthier beverage alternatives to carbonated drinks and sugary beverages. Strawberry juice, known for its nutritional content and potential health benefits, is gaining popularity as a refreshing and nutritious option.
- Flavor Preferences:** The sweet and tangy taste of strawberries is widely enjoyed, making strawberry juice a desirable choice for consumers who prefer fruity flavors. It is often used as a base or ingredient in smoothies, cocktails, and other mixed drinks.
- Convenience and Accessibility:** Packaged

strawberry juice in various forms, such as bottles, tetra packs, and juice boxes, has made it easier for consumers to enjoy strawberry juice on the go. This convenience factor has contributed to increased sales and market demand. **Product Innovation:** Manufacturers are continuously introducing new and innovative strawberry juice products to cater to consumer demands. This includes the development of organic, low-sugar, and fortified versions of strawberry juice to address specific preferences and dietary requirements. **Global Trade and Distribution:** The ease of international trade and distribution networks has facilitated the availability of strawberry juice products in different regions. This enables consumers worldwide to enjoy strawberry juice, regardless of the local availability of fresh strawberries.
