Abstracts

Neodymium iron boron magnets (Neo, NdFeB or NIB magnets) are the strongest type of permanent magnets commercially available, with magnetic properties that exceed alnico and ceramic(ferrite) magnets. Sintered NdFeB magnets offer extremely high energy product for their size, they have a high magnetic remanence and much higher coercivity than other permanent magnets. They are available in a wide range of shapes, sizes and grades at relatively low prices. Rare earth permanent magnetic materials have high magnetocrystalline anisotropy, high saturation magnetization, high Coercivity, high magnetic energy product and many other advantages. The current Nd-Fe-B magnetic material is the third generation of rare earth permanent magnetic material, which is the generation with the best comprehensive performance. Nd-Fe-B has the advantages of high magnetic energy product, Coercivity, and high energy density, which makes Nd-Fe-B magnetic material widely used in modern industry. At present, new energy vehicles, rare earth permanent magnetic motors, wind power, etc. are the main application fields. In recent years, China has ranked first in rare earth reserves and production in the world, and is the world's largest producer and exporter of rare earth permanent magnet materials. High performance Nd-Fe-B magnetic materials are widely used in energy conservation, environmental protection, green industry and other Low-carbon economy fields. With the deepening of concepts such as clean energy and carbon neutrality, countries around the world have vigorously invested in energy-saving and environmental protection industries. Emerging industries such as new energy vehicles, wind power generation, energy-saving appliances, and industrial robots are rapidly developing, and the demand for high-performance rare earth permanent magnet materials is also experiencing rapid growth.

The global Strong Neodymium Rare Earth Magnet market size was estimated at USD 8286.0 million in 2025 and is projected to grow at a compound annual growth rate

(CAGR) of 5.70% during the forecast period.
