## Abstracts

Strontium iodide (SrI<sub>2</sub>) is a salt of strontium and iodine. It is an ionic, water-soluble, and deliquescent compound that can be used in medicine as a substitute for potassium iodide .[5] It is also used as a scintillation gamma radiation detector, typically doped with europium, due to its optical clarity, relatively high density, high effective atomic number (Z=48), and high scintillation light yield.[6] In recent years, europium-doped strontium iodide (SrI<sub>2</sub>:Eu<sup>2+</sup>) has emerged as a promising scintillation material for gamma-ray spectroscopy with extremely high light yield and proportional response, exceeding that of the widely used high performance commercial scintillator LaBr<sub>3</sub>:Ce<sup>3+</sup>. Large diameter SrI<sub>2</sub> crystals can be grown reliably using vertical Bridgman technique [7] and are being commercialized by several companies. The Strontium Iodide market is experiencing significant growth, primarily due to its crucial role in various industrial applications, particularly in the field of scintillation detectors, radiation measurement, and radiological monitoring. Strontium Iodide, known for its unique properties, is used as a scintillation material for the detection of gamma-ray and neutron radiation. It plays a vital role in the development of high-performance radiation detectors, contributing to various applications in homeland security, medical imaging, and nuclear research. Regions like Asia-Pacific, North America, and Europe are key contributors to the market, reflecting the global demand for Strontium Iodide in industries that rely on accurate radiation detection and monitoring. As the need for precise and efficient radiation monitoring continues to grow, the Strontium Iodide market is expected to maintain its upward trajectory, supporting innovation and safety in various high-tech and research sectors.

The global Strontium Iodide market size was estimated at USD 54.8 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.00% during the forecast period.
