Abstracts

Sugar-free tonic water is a version of tonic water that contains no sugar and typically no calories. Instead of using sugar, it is sweetened with non-caloric artificial sweeteners (such as aspartame or sucralose) or natural alternatives (like stevia or erythritol). The product retains the signature bitter taste from quinine but offers a much lighter option for those looking to reduce their sugar intake. Sugar-free tonic water is commonly used in cocktails, like gin and tonic, as a low-calorie mixer, or enjoyed as a standalone beverage for those following sugar-free, low-carb, or ketogenic diets.
