Sugar replacement refers to any substance used as a substitute for sugar in food and beverages to provide sweetness without the added calories. These alternatives can be natural or artificial and are often used by individuals looking to reduce their sugar intake for health reasons or to manage conditions like diabetes. Common sugar replacements include stevia, erythritol, xylitol, and aspartame. The market for sugar replacement products has been growing steadily in recent years as consumers become more health-conscious and seek out alternatives to traditional sugar.
