Report Overview

Sugar solution resin is a special type of resin mainly used for treating sugar solutions, especially in the sugar industry. This resin usually has ion exchange properties and can effectively remove impurities and pigments in sugar solutions and improve the quality and purity of sugar. The working principle of sugar solution resin is mainly based on the principle of ion exchange. As the sugar solution flows through the resin, the ions in the resin exchange with impurity ions in the sugar solution, adsorbing and removing these impurities. In this way, pigments, colloidal substances and other unwanted ions in the sugar solution can be effectively removed.
