Report Overview

For a long time, sulfonate lignin has been considered as an effective dust remover for unpaved roads. Lignin is a by-product of the paper industry and a 'glue' that binds cellulose fibers together. Lignin is extracted from wood during the pulping process, which makes it soluble in water. The adhesive properties of lignin make it an effective dust removal solution. Lignin is usually diluted with water before application. Most applications require about half a gallon of lignin concentrate per square yard.
