The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Sulfonylureas for Type 2 Diabetes competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.In 2024, global Sulfonylureas for Type 2 Diabetes production reached approximately 4336.42 M Units, with an average global market price of around 5.84 USD per Unit. The global prevalence of type 2 diabetes continues to rise, with an expanding number of high-risk groups such as the middle-aged and elderly, and obese individuals. Some hypoglycemic drugs have limited efficacy in controlling blood sugar or significant adverse reactions. Sulfonylureas, however, balance the core needs of ""achieving therapeutic goals"" and ""safe medication"" with their potent blood sugar-lowering effects and optimized safety profile. They are particularly suitable for high-risk groups such as the middle-aged and elderly, and those with underlying medical conditions, eliminating clinical concerns about ""unstable blood sugar control"" or ""excessive risk."" As a classic oral hypoglycemic agent for the treatment of type 2 diabetes, sulfonylureas precisely address the core pain points in clinical treatment, and their market potential continues to expand against the backdrop of a continuously rising global demand for diabetes prevention and control.Sulfonylureas are a class of oral medications used primarily to treat Type 2 Diabetes Mellitus. They are among the oldest and most widely used anti-diabetic drugs, known for their high efficacy and relatively low cost.Sulfonylureas for Type 2 Diabetes are mainly divided into Glibenclamide, Glipizide, Gliclazide, Glizidone, and Glimepiride, which have advantages such as strong hypoglycemic effect, milder side effects, and more convenient dosing frequency.The upstream raw materials for Sulfonylureas for Type 2 Diabetes mainly include active ingredients such as glibenclamide, glipizide, gliclazide, glimepiride, and glimepiride. Typical suppliers include AGC Pharma Chemicals, ICROM, Gedeon Richter, and Dr.
