Abstracts

Sulphur organic paper dyes represent a specialized category of colorants derived from sulfur-based organic compounds, primarily used for dyeing paper and paperboard products to achieve a range of deep, rich shades, especially blacks, browns, blues, and dark greens, through a chemical process that involves the application of sulfur dyes in a reduced, soluble state followed by oxidation to fix the color onto the cellulose fibers. These dyes are valued for their cost-effectiveness, good color fastness, and suitability for bulk paper production, though they are distinct from other dye types like direct or acid dyes due to their specific chemical properties and application methods tailored to paper substrates.

The global Sulphur Organic Paper Dyes market size was estimated at USD 120.45 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.50% during the forecast period.
