Abstracts

Sultamicillin is an oral form of the antibiotic combination (codrug or mutual prodrug) ampicillin or sulbactam. It contains esterified ampicillin and sulbactam. The pharmacokinetic properties of sultamicillin are improved compared to a combination of ampicillin and sulbactam. Sultamicillin increases the absorption and decreases the chances of diarrhea and dysentery. The inclusion of sulbactam extends ampicillin's spectrum of action to beta-lactamase producing strains of bacteria. Oral sulbactam with parenteral form provides a regimen of continuous sulbactam therapy throughout the treatment, resulting in better clinical results. The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022.
