Abstracts

Sultamicillin tosilate is a beta-lactamase inhibitor combination antibiotic consisting of sultamicillin, the mutual prodrug of ampicillin and sulbactam, with tosilate as the counterion to enhance stability and bioavailability. This formulation is designed to overcome bacterial resistance by inhibiting beta-lactamase enzymes, thereby extending the spectrum of ampicillin's antibacterial activity against both gram-positive and gram-negative organisms. It is primarily indicated for respiratory, urinary tract, skin, and soft tissue infections caused by susceptible bacteria, offering a dual mechanism that improves efficacy in environments where resistance is a concern.

The global Sultamicillin Tosilate market size was estimated at USD 380.25 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.15% during the forecast period.
