Abstracts

Sunflower oil for cooking is a vegetable oil extracted from sunflower seeds, commonly used in various culinary applications due to its mild flavor and high smoke point. It is ideal for frying, saut?ing, baking, and making salad dressings. Refined sunflower oil is the most common type, offering a high smoke point (around 440°F or 227°C), which makes it suitable for high-heat cooking. Cold-pressed sunflower oil retains more of the oil's natural nutrients, including vitamin E and omega-6 fatty acids, and is often used in low-heat or raw preparations. Sunflower oil is valued for its health benefits and versatility in the kitchen.
