Surface Mounted Air Curtain is an air barrier device installed on the door lintel or wall. It forms an invisible barrier by generating high-speed airflow to isolate indoor and outdoor air circulation and maintain indoor temperature, air quality and environmental hygiene. Compared with embedded air curtains, surface mounted air curtains do not require complex structural adjustments or reserved ceiling space, and are flexible and adaptable to installation. Its core functions include blocking the exchange of hot and cold air, reducing energy consumption, and preventing dust, insects and odors from entering the room, while maintaining convenience of passage and transparency of sight.

The global Surface Mounted Air Curtain market size was estimated at USD 391.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.20% during the forecast period.
