## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Surface Particle Detector competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global annual production capacity of surface particle detectors reached 22,000 units, while actual output was approximately 17,500 units. The average global market price was about US\$12,000 per unit, and major manufacturers reported gross profit margins ranging from 35% to 52%. A surface particle detector is a precision device used to detect and quantify microscopic particles and contaminants on product surfaces. It is widely used in semiconductor wafer processing, display panel manufacturing, optical component fabrication, pharmaceutical packaging, and cleanroom quality control. The instrument typically employs laser scattering, optical sensing, or imaging technology to provide rapid and accurate particle measurement. The industry chain for surface particle detectors includes upstream suppliers of optical lenses, laser diodes, high-resolution CMOS/CCD sensors, precision motion components, embedded processors, and cleanroom-grade housings. Midstream manufacturers?mainly in Japan, the U.S., Germany, South Korea, and China?handle optical system design, algorithm development, calibration, and full machine integration. Downstream applications cover semiconductor fabs, display panel factories, optical coating and polishing lines, pharmaceutical packaging facilities, and advanced cleanrooms. End users focus on detection accuracy, repeatability, environmental adaptability, false-positive control, automation capability, and compliance with ISO and SEMI contamination standards.

The global Surface Particle Detector market size was estimated at USD 210.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.40%

during the forecast period.
