Report Overview

A swimming pool liner is a crucial component of an in-ground swimming pool, serving as the barrier between the water and the pool's structure. It is typically made from materials such as vinyl, polyester, or polyethylene, which are designed to be durable, resistant to chemicals, and UV rays. The liner's primary function is to contain the water within the pool, providing a smooth and clean surface for swimmers. It also plays a significant role in maintaining the pool's structural integrity by preventing water seepage and protecting the pool walls and floor from damage. The liner is usually custom-fitted to the pool's shape and size, ensuring a snug fit that minimizes water loss and maximizes efficiency.
