### Report Overview

Swimwear is clothing designed to be worn by people engaging in a water-based activity or water sports, such as swimming, diving and surfing, or sun-orientated activities, such as sun bathing.

Developed countries such as the US, Germany, the UK, Japan, and Australia have relatively well-penetrated swimwear markets, where product innovations continue to be a key driver. The large number of swimming pools and water parks in most western countries adds to the wide scale adoption of swimwear. In the US, the water sports participation rates went up. While traditionally western countries have been dominant markets, there is a relative growth in the adoption of swimwear in developing countries in recent times, more so in APAC. Strong macroeconomic fundamentals, coupled with an increasing preference for swimming as a leisure and recreational activity, are propelling the growth of the global swimwear market.
