Abstracts

Swine feed acidulants refer to additives or substances added to the diet of swine (pigs) to acidify the feed. Acidulants are compounds that can lower the pH of a substance, and in the context of swine nutrition, they are often used for various purposes to enhance the health and performance of pigs. The market growth is primarily attributed to the growing awareness of the benefits of swine feed acidulants, the rise in the prevalence of animal diseases and disorders, the ban on the use of antibiotic growth promoters in animal feed, and the increasing swine population worldwide.
