Report Overview

The global superabsorbent polymers market is benefitting with the increasing applications of superabsorbent polymers (SAPs) due to their high absorbing capacity. SAPs display properties to absorb and hold large volumes of water and aqueous solutions which make them ideal for water absorbing products such as baby nappies and adult incontinence pads.

Growing geriatric population, populations expansion, growing hygiene awareness among consumers and rising disposable income are expected to be key drivers. In addition, the widespread application of SAP for solidification of medical waste is likely to have a positive bearing on the demand for SAP. Europe emerged as the dominant region is likely to witness moderate growth rates. North America was the second largest region in term of market share. Asia Pacific, especially India super absorbent polymer market, is likely to witness highest growth owing to growth in infant population and increasing disposable income.
