Abstracts

Tea bag is a small, porous, sealed bag containing dried plant material, which is immersed in boiling water to make a hot drink. Classically these are tea leaves, but the term is also used for herbal teas (tisanes) made of herbs or spices. Tea bags are commonly made of filter paper or food-grade plastic, or occasionally of silk. The bag contains the tea leaves while the tea is steeped, making it easier to dispose of the leaves, and performs the same function as a tea infuser. Some tea bags have an attached piece of string with a paper label at the top that assists in removing the bag while also displaying the brand or variety of tea. Top 3 players which are Lipton (Unilever), Twinings (Associated British Foods), Tetley (Tata Global Beverages) take about 35% of the market.

The global Tea Bag market size was estimated at USD 16140.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 2.90% during the forecast period.
