Report Overview

Teleshopping means buying goods and services by telephone or via the internet. It does not involve correspondence and personal visits. The seller prepares a short advertising film which is shown on television screen. It gives a full demonstration of the working of the product along with a list of contact phone numbers in every city. People who feel convinced of the utility of the demonstrated product contact the seller on telephone and place orders. Goods are delivered to buyers through courier or value payable post (v.p.p.). The main advantage of teleshopping is convenience for the customer. The customer can purchase the product without visiting the seller. This saves valuable time, effort and money. Customers can make payment through their credit cards. Asian Sky Shop, Telebrands are examples of companies which provide teleshopping facilities in India. Computer systems have made it easier by playing recorded messages and then record the information given by customers. Teleshopping, however, does not offer the opportunity to the customer to examine the product before buying. Computerised systems used in teleshopping are expensive.
