Report Overview

Terminated Polyether Polyols are a type of polyol resin used in the production of polyurethane (PU) materials. The term 'Terminated' refers to the presence of functional groups, such as Hydroxyl (-OH) or Amine (-NH₂), at the ends of the Polyether chains. These functional groups play a crucial role in the reaction with Isocyanates to form the cross-linked Polymer network in Polyurethane materials. Terminated Polyether Polyols provide flexibility, durability, and hydrophobicity to the resulting Polyurethane products. They are commonly used in applications such as flexible foams, adhesives, coatings, sealants, and elastomers.
