Abstracts

Texture paint is a special paint that can maintain the texture design even after drying, such as stippling. There are several different varieties of this paint, smooth, sandy or rough. Rough has a popcorn effect and is usually used as a ceiling paint. Always look for the paint that can give you the longest drying time to meet your experience level. The longer the drying time, the more chance you must make the paint have a dramatic effect or correct any defects before the paint solidifies. Global core texture paint manufacturers include Asian Paints, RPM International etc. The top 5 companies hold a share about 30%. Asia Pacific is the largest market, with a share about 42%, followed by North America and Europe with the share about 31% and 19%. In terms of product, premium finishes is the largest segment, with a share over 33%. And in terms of application, the largest application is residential, followed by commercial.

The global Textured Paint market size was estimated at USD 1524.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.10% during the forecast period.
