### Report Overview

Thermal magnetic molded case circuit breakers use sensors to monitor the temperature and magnetic field strength of the circuit. The response to overcurrent is slower than that of electronic molded case circuit breakers, but it is sensitive to transient currents. The molded case circuit breaker seals the contacts, arc extinguishing chamber, release and operating mechanism in a plastic case, and the undervoltage release and shunt release are mostly modularized. Thermal magnetic molded case circuit breaker does not require an external power supply, has strong anti-interference, does not need to use a trip coil, has the characteristics of small size, high breaking capacity, and short flashover (adding a zero flashover cover to achieve zero flashover).

This report provides a deep insight into the global Thermal Magnetic Molded Case Circuit Breaker market covering all its essential aspects.
