Abstracts

A three-in-one sensor faucet is an advanced plumbing fixture that integrates sensor-based automatic operation, water temperature regulation, and flow control into a single unit, designed to enhance hygiene, convenience, and water efficiency in residential, commercial, and public settings. By eliminating the need for physical contact, these faucets reduce the spread of germs and cross-contamination, while built-in thermostatic valves ensure consistent water temperature, and motion sensors optimize water usage by activating only when hands are detected. Common applications include kitchens, bathrooms, hospitals, restaurants, and airports, where touchless operation supports sanitation protocols and sustainability goals, making these faucets a key component of modern, intelligent building systems.
