Report Overview

The tire carousel is a specialized storage and retrieval system designed to efficiently organize and manage tires in retail, warehouse, or automotive service environments. It typically consists of a rotating platform or series of shelves that allow for easy access to tires of various sizes and types, optimizing space utilization and reducing manual handling. These systems are often automated or semi-automated, featuring motorized rotation, digital inventory tracking, and ergonomic designs to enhance operational efficiency. Tire carousels cater to businesses dealing with high volumes of tires, such as auto dealerships, tire retailers, and logistics centers, by streamlining storage, minimizing floor space requirements, and improving inventory accuracy.
