Abstracts

Tire mounting lubricants are specialized chemical solutions or gels applied to the bead and rim surfaces of tires during installation to reduce friction, prevent damage to rubber compounds, and ensure an airtight seal by allowing the tire to slide smoothly onto the wheel without pinching or tearing; these products are distinct from general-purpose lubricants due to their formulation, which is designed to be non-corrosive to rubber and metal, water-soluble for easy cleanup, and free of petroleum distillates that could degrade tire integrity over time.
