Abstracts

Halogenated butyl rubber is obtained through the halogenation of the isoprene groups of the butyl rubber, producing a rubber with improved properties and characteristics. HIR presents higher curing rates and can easily co-vulcanize in elastomer blends with other rubbers. Tire use halogenated butyl rubber refers to such rubber used in tire production. The automotive sector, including passenger cars and commercial vehicles, is the primary driver of tire demand. While mature markets like North America and Europe are relatively stable, emerging markets in Asia-Pacific, Africa, and Latin America are experiencing strong growth due to rising disposable incomes, urbanization, and increasing vehicle ownership. The rise of electric vehicles presents a major shift in the tire industry. EVs require specialized tires that can handle increased torque, provide low rolling resistance to maximize battery life, and support heavier vehicle weights. This transition creates opportunities for tire innovation and product development. The global tire market is poised for steady growth, driven by the expanding automotive industry, the shift towards electric vehicles, and the consistent demand for replacement tires. The fast growth tire market will provide sufficient support for halogenated butyl rubber. There are mainly three producers of tire use halogenated butyl rubber in China. In August 2018, five-year anti-dumping duties on halogenated butyl rubber from the United States, the EU and Singapore were imposed by China. In Sep, 2024, China will continue to impose anti-dumping duties on halogenated butyl rubber originating from the United States, the European Union (EU), the United Kingdom (UK) and Singapore. Duties ranging from 23.1 to 75.5 percent will be levied toward the related companies for a five-year period, according to the ministry.

The global Tire use Halogenated Butyl Rubber market size was estimated at USD 3424.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.80% during the forecast period.
