## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Tissue Packaging Lines competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of tissue packaging lines reached 46,500 units, with an average selling price of US\$99,500 per unit and a gross profit margin of 49.92%-50.3%. Direct materials accounted for 23.47% of the total. Annual production for each company ranged from 50 to 290 units. Downstream customers included KIFFE, Hengan Group, Zhongshun Roujie, Vinda Group, Lee & Man Paper, MURO (Spain), and ALLIED WEST PAPER (USA). Tissue packaging equipment is diverse and can be divided into paper forming machinery and paper processing machinery. Tissue packaging lines include: napkin machines, toilet paper machines, facial tissue machines, mini tissue machines, hand towel machines, non-woven fabric rewinding machines, square towel machines, and handkerchief machines. As a daily necessity, the demand for tissue paper exhibits strong counter-cyclical characteristics. With the improvement of residents' living standards and the optimization of consumption structure, the demand for household paper products has expanded, driving the growth of the household paper equipment industry market. In recent years, the size of China's household paper machinery market has steadily increased at a rate of approximately 10% per year, making it one of the world's largest household paper machinery markets. From a consumer market perspective, China's per capita household paper consumption lags behind that of developed countries, indicating vast room for growth. Meanwhile, international demand for household paper is also continuously rising. This has further prompted household paper manufacturers to expand production scale and upgrade equipment, thereby stimulating demand for intelligent equipment.

The global Tissue Packaging Lines market size was estimated at USD 4627.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.80% during the forecast period.
