Abstracts

Titanium wire is a slender material made from titanium metal, characterized by excellent strength, corrosion resistance, and lightweight properties. It is widely used in aerospace, medical devices, chemical industries, and electronics, etc. Titanium is a high-strength, low-density metal material with excellent corrosion resistance and biocompatibility. Titanium is used in a wide range of applications, including aerospace, medical equipment, chemical equipment and sports equipment. In recent years, the market demand for titanium has continued to grow. With the rapid development of the aerospace and medical industries, the demand for lightweight and high-strength materials is increasing. Especially in the aerospace field, the use of titanium alloys is increasing year by year because it can effectively reduce the weight of aircraft and improve fuel efficiency. In addition, the use of titanium in medical devices is also increasing, especially in implants and dental materials due to its excellent biocompatibility. At the same time, titanium wire (Titanium Wire) technology has made significant progress. Titanium wire is increasingly used in medical, electronics and manufacturing fields. In the medical field, titanium wire is used in bone nails, bone implants, etc., which can effectively promote bone healing; in the electronic field, titanium wire is used to make high-performance electrodes and wires. With the improvement of production technology, the strength and toughness of titanium wire have also been significantly improved. Currently, challenges facing the titanium industry remain. Although titanium has superior properties, its high production cost is still one of the factors restricting its widespread application. To this end, researchers and companies are working hard to develop new processes and materials to reduce titanium production costs and improve its market competitiveness.

The global Titanium Wire market size was estimated at USD 386.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.60% during the
