Abstracts

Toilet coating sprays are specialized aerosol products designed to create a temporary hydrophobic or non-stick film on the interior surface of toilet bowls, thereby preventing waste from adhering to the porcelain and reducing the need for manual cleaning. The product functions by utilizing advanced polymer or silicone-based formulations that form a protective barrier upon application, which repels liquids and solids while also often incorporating mild cleaning agents, fragrances, or antimicrobial additives to enhance user convenience and hygiene. These sprays are marketed primarily as preventative maintenance tools aimed at improving toilet cleanliness, minimizing staining, and decreasing the frequency and effort of scrubbing, positioning them within the broader categories of household cleaning and sanitation products.

The global Toilet Coating Sprays market size was estimated at USD 280.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.75% during the forecast period.
