## Abstracts

Tool post grinders are cylindrical grinders which are mounted on the tool post of a lathe. Tool post grinders are easy to install - just remove the lathe saddle and install the tool post grinder, and tighten it with a screw. Tool post grinders are available according to the different sizes of grinding wheels. Tool post grinders are commonly used in automotive, mechanical, and automobile industries in operations such as facing, and cutting, providing high surface finish and accuracy. Besides, less pressure is applied on the work piece; it can cut any type of metal at high speed rate, and gives a smooth surface. Thus, the market is likely to see significant increase in demand for tool post grinders during the forecast period.
